

Clinic Clips your guide.

We want to share snapshots of our clinic consistently with our followers on social media and our website. Our medical assistants are one of the most important parts of our brand — we'd love to have you help contribute 2–3 short clips per week.

How to film

- **Hold the phone vertical** (9:16) — fills the screen on Reels & TikTok.
- **Face toward a window or light** — it should light your face, not silhouette it from behind.
- **Get close for sound** — quiet room, no echo. Audio matters more than the camera.
- **Wipe the lens**, keep the phone steady — lean it against a wall, box, or shelf.
- **Do 2–3 takes** and keep it short — 20–45 seconds is plenty.
